SUMMARY

Motivated and detail-oriented Computer Science undergraduate with a strong foundation in data structures, algorithms, and full-stack web development (MERN stack). Demonstrated ability to build real-world applications and solve complex problems, with 500+ coding challenges solved across LeetCode, Codeforces, and GFG. Eager to contribute to impactful software projects in fast-paced, collaborative environments.

EDUCATION

- **B.Tech, Computer Science and Engineering**, NIT Jamshedpur 2023 – Present, CGPA: 8.77
- **Class XII – CBSE**, GGPS, Bokaro 2020 – 2022, 95.83%
- **Class X – CBSE**, GGPS, Bokaro 2019 – 2020, 94.4%

TECHNICAL SKILLS

Languages: C | C++ | JavaScript

Data Structures and Algorithms | Web Development

Web Technologies: HTML | CSS | JavaScript | React | Express | NodeJS

Databases: MySQL | MongoDB

Tools: Github | Cloudinary | Render | Vercel

RATINGS

- Solved 500+ Problems on platforms like Leetcode , Codeforces , GFG and compiled my coding journey on [codolio](#)

PROJECTS

LANGBUDDY – Language Sharing Platform | [Source Code](#) | [Website Link](#)

- Built a real-time platform for global language learners with **instant messaging** and **peer-to-peer video calls**.
- Implemented **JWT authentication**, onboarding flow, friends system, protected routes, and many UI themes.
- Integrated **WebSockets** for low-latency chat, **WebRTC** for video calls, and developed/tested **REST APIs**.
- Deployed **production-ready** React/Tailwind frontend and Node.js/Express/MongoDB backend to cloud platforms.

INSTACLONE – Full-Stack Social Media Platform | [Source Code](#) | [Website Link](#)

- Developed a social media platform clone with **real-time chat**, stories, reels, notifications, and post interactions.
- Implemented **JWT authentication**, follow/unfollow system, and media uploads via **Cloudinary**.
- Built responsive UI with **TailwindCSS**, supporting stories that expire in 24 hours and reels-style short videos.
- Integrated **Socket.IO** for instant messaging and live updates to deliver a seamless user experience.

LIVECODE – Realtime Collaborative Coding Platform | [Source Code](#) | [Website Link](#)

- Developed a full-stack collaborative coding platform allowing multiple users to code together in realtime using **WebSockets (Socket.IO)**.
- Integrated **Piston API** to enable live code compilation and execution across multiple programming languages.
- Implemented room-based collaboration for isolated sessions with synchronized editors using **Monaco Editor**.
- Designed a clean and responsive UI using React, providing users with a seamless, live coding experience.
- Ensured backend stability with Express.js, handling room management, user connections, and secure API communication.
